

Pre-Event Protocol that has been used and will be implemented-

- Currently and continually seeking advice from and collaborating with local authorities and public health officials for current COVID-19 restrictions and recommendations.
- Provide resources that detail the signs and symptoms of COVID-19 on event web site to help educate potential event-goers and staff on whether they should attend or stay home.
- Require staff and event-goers to stay home if they have any COVID-19 symptoms, including fever, cough, or gastro-intestinal issues. Additionally, require attendees to not attend the event if they have been diagnosed with COVID-19, or had direct contact with an individual diagnosed with or suspected to have COVID-19 in the past 10 days.
- Provide access to hand-washing stations with soap and water or hand sanitizer containing at least 60% alcohol if the former is unavailable.
- Provide instructions on proper hand washing at hand washing stations (at least 20 seconds in accordance with CDC/WHO guidelines).
- Use an event-specific medical response plan, designating responsible persons, nearby emergency services, and determining how to isolate and transport staff or attendees experiencing a medical emergency. Coordinate and implement plans for quickly and safely evacuating an event.
- Event capacity based on the geometry and physical characteristics of your venue. This should include factors like social distance while spectating, presence of cross traffic movements, and physical distance/density of attendees.
- Modify attendee/staff density to enforce all safety protocols, including six-foot (two-meters) physical distancing requirements in all venue spaces where attendees congregate — including restrooms, queuing areas, vendor areas, and during ingress and egress procedures. (The spectating areas of the facility will be limited to 10 spectators per bleacher grouping, and signage will be used to designate.)
- Assign staff to cleaning tasks performed before, during, and after the event. Clean and disinfect commonly touched surfaces like tables, countertops, toilets, faucets, sinks, etc. Before the event using CDC and/or WHO cleaning and disinfecting guidelines.
- Clearly mark all areas of allowance for the mixing of attendees and participants, with clear lines of demarcation between those that will be the entertainers and participants, and those there to spectate.

### Protocols and measures that will be used during event-

- Require all attendees and staff to wear CDC/WHO recommended face coverings during the event when moving about the event grounds.
- Provide access to hand-washing stations with soap and water or hand sanitizer containing at least 60% alcohol if the former is unavailable. Encourage attendees to use hand sanitizer or wash hands upon entry and exit of your venue, exit of bathrooms.
- Provide instructions with signage on proper hand washing at hand washing stations (at least 20 seconds in accordance with CDC/WHO guidance).
- Remind event-goers not to touch their eyes, nose, or mouth and remain socially distanced from those not in their immediate family or group of attendees.
- Event-goers should cover their nose and mouth with an approved face cover when around others not in their immediate group. Exceptions are for children under two, persons with medically established breathing issues, or someone who is unconscious/incapacitated or unable to remove their face cover independently.
- Per physical distancing guidelines, event-goers should stay at least six feet (two meters) from one another, even if they are wearing face coverings.
- Provide culturally appropriate messages and materials to prohibit certain actions like handshakes or high-fives that are common at many events but could facilitate the spread of COVID-19.
- When not wearing a recommended face cover, event-goers should cough or sneeze into a tissue or their elbow, not touch their face, and should then wash their hands.
- Screen event-goers for COVID-19 symptoms, and take the temperature of each entrant to the facility as they come in through the ticketing both area. Require individuals with visible COVID-19 symptoms, such as a repeated cough, to leave the event immediately, review reporting requirements.
- When vendors serving food, use pre-packaged single use utensils and single serve condiments. Follow WHO and/or the U.S Food & Drug Administration recommendations for COVID-19 food safety personnel and their food prep procedures.
- If an event-goer displays symptoms, communicate potential exposure to staff and clean and disinfect the event space.
- Designate and denote a location to isolate event-goers and/or staff who demonstrate signs or symptoms of COVID-19 — and staff member who will respond to ill attendee concerns.

**Post Event Day Activities-**

- If an event-goer displayed symptoms at the event, communicate potential exposure to the city of Wickenburg, public health officials, staff, and clean and disinfect the event space.
- Clean surfaces with soap and water before using an approved household disinfectant. Clean and disinfect commonly touched surfaces like tables, doorknobs, countertops, handles, toilets, faucets, sinks, etc. after the event using WHO and/or the CDC and/or WHO cleaning and disinfecting guidelines.
- Clean and disinfect surfaces and spaces of both the spectating and the performing areas between events.

Thank you for your time and efforts!

---

Addendum to Rodeo Application:

Covid plan:

Our event will only allow for 50% capacity which is no more than 1,200 tickets sold per day.

We will have one designated volunteer as our "covid monitor" helping ensure safety of our guests.

A handwritten signature in black ink, appearing to read "Ray L. Dufour". The signature is written in a cursive style with a long horizontal flourish extending to the right.

# Rodeo Area

**CONSTELLATION PARK RV CAMPGROUND**  
 Self-Contained RV's only. No Tents.  
 First-Come First-Serve. NO Reservations.
